DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 25, 26, 28-33, 35-40, 42-61, 65-69 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shindo of record for reasons of record in view of The Japan Energy Homepage reference that was printed on 6/30/00 and referenced on IDS filed 5/10/02.

The Shindo patent discloses the claimed range of most of the impurities (see Abstract). The reference further discloses that the balance of the cobalt material is unavoidable impurities (see Abstract). The secondary reference is cited to show some of the other elements that can be included in the unavoidable impurities (see chart on page 1 of the printout).

Accordingly, the invention as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the cobalt material as disclosed in the Shindo patent with the teachings contained in the secondary reference, because the secondary reference

discloses the ranges of other elements which are present as unavoidable impurities.

Although the reference was printed out on the filing date of the application, the information would still be applicable under 102(a), since the work by another before the filing date of the present application.

Response to Arguments

Applicant's arguments, filed 12/9/04, with respect to the rejection(s) of claim(s) under 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made as shown above.
